

TechTrade

A product pitch by Benjii Costa

The Problem

- Many tech consumers, from power users to technically-inept individuals, go through the same process—purchasing devices
- Many people usually know what they're looking for, but for others it can be a bit more complicated
- Deciding whether to **repair, upgrade, sell, or replace** can be difficult when details are obscured by big-industry and clever marketing

Your Solution

TechTrade is the end-all-be-all **solution** to the frustrations of making the wrong financial decision in the heat of the moment. TechTrade primarily focuses on:

- Current device, device specs, and value
- User's needs and budget
- What is the right decision for the user's scenario

Website Type

TechTrade will be a simulation of the analysis and recommendation process in order to identify:

1. Whether this service is effective
2. Opportunities for monetization
3. Preferred UI/UX based on user feedback

Software Development Process

For the development of this site, AGILE will be utilized, centering the overall build around user feedback to produce the best results.

Target Audience

US1: Alex Martinez

- **Gender:** Male
- **Age:** 21
- **Location:** Kingston, Rhode Island
- **Occupation:** College Student / Part-Time Retail Employee
- **Income:** \$18,000/year
- **Web Use:** Daily — schoolwork, shopping, social media, streaming, and technology research
- **Reason for visiting TechTrade:** His three-year-old laptop has become slow. He wants to know whether he should repair, upgrade, sell, or replace it without spending more money than necessary.

As a college student with a limited budget, I want to evaluate whether I should repair, upgrade, sell, or replace my aging laptop so that I can keep a reliable computer without spending more money than necessary.

US2: Sarah Thompson

- **Gender:** Female
- **Age:** 42
- **Location:** Warwick, Rhode Island
- **Occupation:** Marketing Manager
- **Income:** \$78,000/year
- **Web Use:** Daily — work, online shopping, banking, streaming, and product research
- **Reason for visiting TechTrade:** Her five-year-old laptop is experiencing performance problems. She wants to determine whether repairing or upgrading it makes more financial sense than purchasing a replacement.

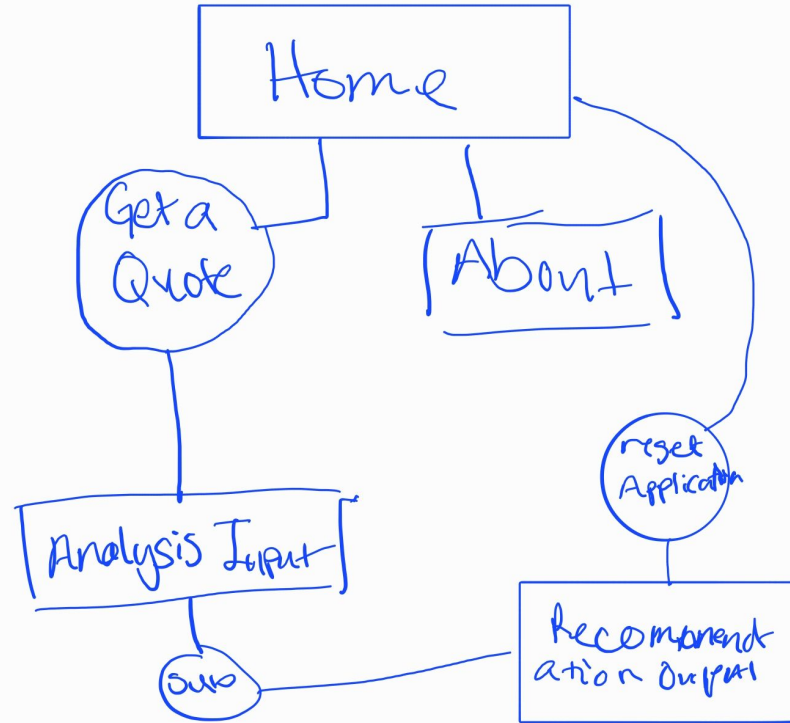

As a busy professional who isn't an expert in computer hardware, I want a simple way to compare repairing, upgrading, selling, or replacing my laptop so that I can make a confident purchasing decision.

Key Content & Features

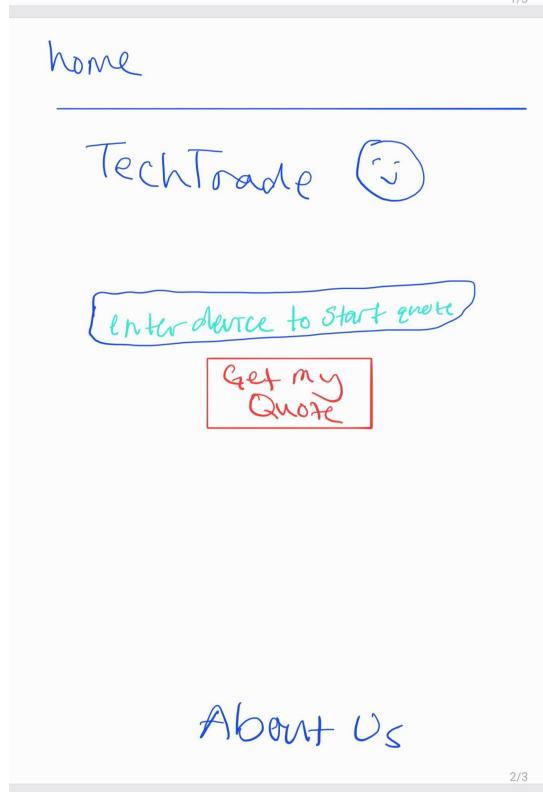

Visitors will have a no-account experience that facilitates the analysis and recommendation process. Required pages include:

- **Homepage**
 - Give a Quote (nav button)
 - About (text section)
- **Analysis Input**
 - *Includes text fields, dropdowns, and a submit form button*
- **Recommendation Output**
 - *Includes full recommendation which will include a .pdf download button, appropriate links, and a button to restart the application process*

Pitch Summary

TechTrade is an everyday tool that will **analyze, educate, and enhance users' knowledge and experience with their technology and finances.**

Key benefits include: Better financial management, intuitive and purpose-built decision making, and a user-friendly UI/UX for all

Personal Experience: Being a Samsung consultant for Best Buy, I observe and engage in this process regularly—I believe this will be a great utility both in the field and for personal use

Feedback Questions

Include any specific areas where you'd like peer or instructor feedback.

- Is the solution clear?
- Are the features too much/little?
- Is the target audience well-defined?
